

Scalable Redundancy

Scalable Run-time

Scalable Power

At scaling or at Maintenance

- Fast
- Safe
- On-the-fly

POWER TRUNK

The battery module comes with 64 x 7Ah/12V lead acid battery units distributed into eight hot-swappable battery cartridges. You can add more modules (totally up to 4 modules in a rack) to obtain enhanced power capacity, extended runtime and redundancy. No tools are needed to add or replace a module or a battery cartridge, and it may be done on-the-fly during normal operation not needing to neither shut down nor go into by-pass operation.

Energy storage for ride-through during grid outages

- Battery monitoring and fault handling
- Hot-swappable for fast addition or replacement of modules and cartridges
 - No tools
 - No downtime
 - No by-pass transition
- Optimal battery lifetime and availability
 - Ventilated battery strings and temperature control
 - Smart battery charge management
- Capacity
 - Power: 20 kW continuous power capacity per module (equivalent AC power)
 - Volt-Ampere-Hour: 5376 VAh
 - Topology: Two battery strings equivalent to 3 384 VDC (at nominal battery voltage)
- Dimensions
 - W: 19" rack mount
 - H: 8U
 - D: 800 mm

Approvals
